Who we are

«Our group shares a model of values that constitutes **our DNA**: collaboration, communication, customer orientation, flexibility, security, results orientation and thinking about profitability. These seven values guide us in the way we approach our work and represent the elements that matter to us in relation with our customers, our suppliers or our employees.

As for our signature, it reflects our areas of expertise:
"Projects / Products / Service".

Everything starts from the **project**. Initially, we are project managers. It is through contact with customers, on site, by facing their problems, that we can truly understand the realities on the ground and understand their needs. We are also keen to maintain the central "project management" activity in Belgium, our home territory, to maintain this contact on site.

Then come the **products**. Based on a catalog of niche and exceptional products, specialized in security and manufactured in Belgium, we can sell all around the world. To do this, we rely on a network of installer partners, specialists on their markets.

Finally comes the **service**. Ensuring on the field by our partners, it is also a state of mind in our company: through our business centers and our customer relationships, we have a goal which guides all our actions: we wish to build with the customer a qualitative long-term relationship.»

HIGH SECURITY JOINERY WITH SLEEK DESIGN

STUDY AND ANALYSIS OF REQUIREMENTS

- risks analysis
- performance level specification
- budget calculation

RESEARCH & DEVELOPMENT

- 2D and/or 3D drawing
- prototype
- developed by Metal Quartz or based on Forster profiles

COMPLIANCE TESTS TO THE SECURITY STANDARDS

- according to European, national or sectorial norms
- in approved laboratories and/or by appropriate authorities

IN-HOUSE PRODUCTION

- tracking of raw materials
- manufacturing and assembly in our Belgian workshops
- ISO 9001 supervision
- CE marking

Bunkerkit®

ARMORED, CERTIFIED MODULAR ROOMS AND PANELS

1

PROTECTION

- **Numerous performances** : burglar-proof, bulletproof, EMC / EMI shielding, strong room, fireproof, thermal, acoustic insulation, ...
- **Tested compliant** : according to European applicable standards in official laboratories (CNPP, ERM, Banc national d'épreuve de Saint-Etienne, ...)
- **Certified** : A2P for burglar-resistance RC3, RC4 et RC5 (EN 1627-1630), ECB-S for class V (EN 1143-1)

2

INSTALLATION

- **Quick** : Bunkerkit can be installed in a few hours without problems
- **Easy** : mechanical assembly, by bolting only, kit elements with optimized dimensions and reduced weight for easy handling on site, in all types of rooms
- **Clean** : no heavy work, no dust, no welding; with the possibility of a smooth finish on each side of the wall for a neat aesthetic

3

- **Multiple configurations** : curved facades, angles, indoor or outdoor installation (security booths), mixing and compatibility of different performances
- **Dismountable et reusable** : the elements are reusable, transportable and can be reassembled in the same or in another configuration
- **Adapted accessories** : integration of glazing, counters, doors, parcel pass-throughs, wire-passage, ...

FB3 to FB7 & AK47

VAULT ROOM
EN 1143-1
Grades I to XIII

ELECTROMAGNETIC SHIELDING
IEEE 299-2006
from 50dB to 80-100dB
for frequencies from 9KHz to 18GHz

- + FIRE-PROOF
- + ACOUSTIC PROTECTION
- + THERMAL INSULATION
- + AIR, WATER, WIND TIGHTNESS

THE CONCEPT

Bunkerkit® is a unique concept of modular shielded room for the protection of people (bulletproof shielding), property (burglar-proof shielding) and/or data (electromagnetic shielding).

The Bunkerkit® panel is composed of one or more layers of steel which contain different combinations of materials depending on the desired performance.

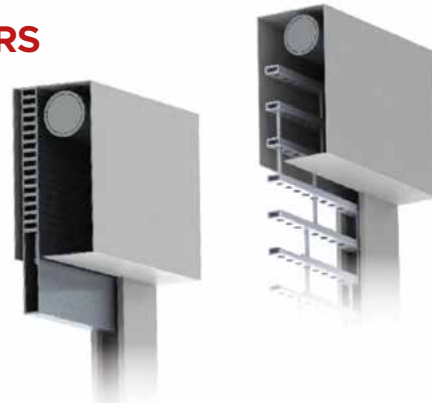

The innovation of Bunkerkit® lies mainly in its modularity: the panels are assembled together by simple bolting and can create compartments ranging from basic partitions to the most complex constructions.

BUNKERKIT®

Stackdoor®

THE AESTHETIC ALTERNATIVE TO ROLLER SHUTTERS

THE CONCEPT

Stackdoor® is an innovative security grille whose elements stack instead of rolling up. Composed of side profiles guiding horizontal steel tubes (stainless or galvanized) and vertical steel connectors (stainless or galvanized), Stackdoor® can be used in any situation, even those where the installation volume is extremely small.

Thanks to the unique "stack-and-pin" technology, the vertical connector rods disappear into the horizontal tubes thanks to clever perforations and the grille retracts vertically by stacking rather than rolling up.

Stackdoor®, an anti-burglary security solution, is CE compliant for its standard model.

Stackdoor® has a unique patented mechanism that automatically locks after the grille is closed, making it impossible to force lift it.

Stackdoor®, in addition to offering protection, also guarantees visibility and air circulation with a slim and strong design. Available in STANDARD, CORNER, CURVED & XXL versions, Stackdoor® is an aesthetic grille suitable for all types of architecture, even the most original.

MAIN BENEFITS

- SPACE SAVING
- BURGLAR RESISTANCE SECURITY
- CE CONFORMITY
- ROBUSTNESS
- CURVED
- CORNER
- XXL
- SLIM DESIGN : VISIBILITY & VENTILATION

MAIN APPLICATIONS

- POINTS OF SALES & LUXURY SHOPS
- AIRPORTS & TRAIN STATIONS
- CAR PARKS
- BUILDING ENTRANCES & BUILDINGS OPEN TO THE PUBLIC
